## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Group I (claims 1-3 and 5) in the reply filed on 11/27/07 is acknowledged. The traversal is on the ground(s) that the search would pose no undue burden to the Office. This is found persuasive because the groups are obvious variants, hence the claims are examined on the merits.

### ***Information Disclosure Statement***

2. There is no IDS, where the information disclosure statement must comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement.

### ***Claim Objections***

3. Claim 1 is objected to because of the following informalities: there are typographical errors, where Applicants may have intended to recite "and" not "und". Appropriate correction is required. Applicants are further respectfully requested to ascertain that the specification is free of typographical and grammatical errors.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation H/OR<sup>9</sup>, H/OR<sup>12</sup>, H/OR<sup>16</sup>, H/OR<sup>18</sup>. It is unclear what the forward slash is meant to indicate, if it is intended as an "or" or a bond.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-5 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the claims of U.S. PGPub 2003/0144523, US'523 (SN09/4852920, which is now issued but no patent number has yet been assigned. The instant claims are within the same scope of US'523, which teaches the compounds of formula (I), formula (II), formula (AB) and processes of making related thereto and therein (see entire document).

8. This is a provisional obviousness double-type patenting, since the applications are not yet patented.

*Claim Rejections - 35 USC § 102*

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

10. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. PGPub 2003/0144523, US'523 (SN09/4852920, which is now issued but no patent number has yet been assigned.

The applied reference has a common inventors/common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

11. The instant claims differ from US'523 in the recitation of a the cyclic version of the epothilone derivatives of formula (II); however US'145, US'372 and US'905 teach the cyclization of epothilone derivatives of formula (II) (see entire documents).

***Claim Rejections - 35 USC § 102***

12. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

13. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Klar et al. (WO00/66589 *equivalent to* US7125893, US'893).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the

inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

14. The instant claims are drawn to the same scope as US'893, which teaches the compounds of formula (I), formula (II), formula (AB) and processes of making related thereto and therein (see entire document).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

15. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Klar et al. DE10041470, DE'470 and DE19908767, DE'767. DE'470 was published 2/28/2002 and DE'767 was published 10/19/2000

16. The instant claims are drawn to the same scope as DE'470 and DE'767 which teach the compounds of formula (I), formula (II), formula (AB) and processes of making related thereto and therein(see entire document).

17. No claims are allowed.

### ***Conclusion***

18. Several prior art made of record and not relied upon is considered pertinent to applicant's disclosure, include, *inter alia*, in view of Schinzer et al. (US5969145, US6043372, US6156905), Danishefsky et al. (US6965034).
